SOLEIA™ FOLDING ARM BOX AWNING

SOLEIA™ PREMIUM FOLDING ARM BOX AWNING

With modern lines, a sleek delicately rounded rectangular shape and a maximum arm projection of 4 metres, the Soleia™ is our Premium Folding Arm Awning. Manufactured in New Zealand from imported components, Soleia™ awnings feature large aluminium profiles which result in an extremely robust and rigid construction. Combined with premium fabrics and top quality folding arms, you can rely on Soleia™ to be a truly superior awning.

The outer box, back plate and front plate are custom made and powder coated in a wide choice of Dulux® colours. The folding arms (hidden when closed), are finished in silver powder coat and feature strong cast end connections and arm supports that lock the angle of inclination of the awning, avoiding any risk of turning in the event of high wind.

A soft-seal runs along the back plate providing protection from the elements, while solid cast aluminium cheeks on both sides and extruded aluminium back and front plates, allow the awning to completely enclose both the arms and the fabric when shut. This effectively protects the awning fabric from dust and moisture.

Available either wall or ceiling mount with automated control. Choose from a wide range of mildew and UV resistant awning fabrics, in stunning styles and colours.

- **Minimum Width** 2510mm
- **Maximum Width** 5920mm
- **Projection** 2000mm, 2500mm, 3000mm, 3500mm, 4000mm
- **Aluminium** Extruded 78mm Rolling Axle. Front Profile & Outer, Box Powder Coated to Dulux® Specifications
- **Fixing Options** Wall or Ceiling Mount
- **Arm Hardware** Imported Premium European Arms, Silver Powder Coat Finish
- **Fixing Components** Stainless Steel, Zinc or Colour Matched
- **Fabric** Planosol® 100% Acrylic - Over 40 colours
- **Automation** Nice® Tubular Motors with optional remote and wind sensor

DELFINA™ FOLDING ARM BOX AWNING

TIMELESS STYLING IN A VERSATILE PACKAGE

Ideal for protecting large outdoor areas, the Delfina™ awning is also easy to install on all types of facades. The slender design of the Delfina™ semi box design makes this awning fantastic and sleek looking, and also suitable for a range of building types.

With flexible fixing points, the versatility of the Delfina™ makes it a great choice for fitting to many New Zealand homes. With framing designed in France and manufactured here in New Zealand from durable powder coated Aluminium, you can choose from a range of colours to match your architecture.

A boxed awning like the Delfina™ is a great option for many reasons; protect yourself and your guests from the weather when extended, and when rolled away, the awning fabric is protected the elements, plant debris and bird droppings.

- **Minimum Width** 2000mm
- **Maximum Width** 5900mm
- **Projection** 1500mm, 2000mm, 2500mm, 3000mm, maximum 3500mm
- **Aluminium** Extruded 78mm Rolling Axle
- **Fixing Options** Wall or Ceiling Mount
- **Arm Hardware** Imported Premium European Arms, Silver Powder Coat Finish
- **Fixing Components** Stainless Steel or Colour Matched
- **Fabric** Planosol® 100% Acrylic - Over 40 colours
- **Automation** Nice® Tubular Motors with optional remote and Wind Sensor

FELICIA™ FOLDING ARM CASSETTE AWNING

BENEFITS OF FELICIA™ FOLDING ARM CASSETTE AWNING

Felicia™ is a cassette awning system which, when fully retracted, encloses the awning arms and fabric inside a cassette, protecting the working mechanisms, fabric and any automation electronics. This compact design gives the product a superior life in New Zealand's variable climatic conditions.

Manufactured in New Zealand from imported European components, Felicia's stylish lines and unobtrusive form will blend in perfectly to match your outdoor decor, when custom made in a wide range of Dulux® powder coat colours. Only the arms, (hidden when closed), remain in a silver powder coat finish. Felicia™ awnings can be motorised for operation by Nice® tubular motors, with remote control operation.

- **Minimum Width** 1820mm
- **Maximum Width** 5920mm
- **Projection** 1500mm, 2000mm, 2500mm, 3000mm, 3500mm
- **Aluminium** Extruded 73mm Rolling Axle. Front Profile & Outer Box Powder Coated to Dulux® Specifications
- **Fixing Options** Wall or Ceiling Mount
- **Arm Hardware** Imported Premium European Arms, Silver Powder Coat Finish
- **Fixing Components** Stainless Steel, Zinc or Colour Matched
- **Fabric** Planosol® 100% Acrylic - Over 40 colours
- **Automation** Nice® Tubular Motors with optional remote and Wind Sensor

BANNETTE™ DROP ARM AWNING

Bannette™ Awnings come in two configurations - with or without arms. The Drop Arm version is ideal for small windows and balcony applications for internal shade and sun protection. The factory assembled arms are sprung to provide even tension on the fabric and are controlled by a gearbox and crank handle or motorised.

- **Minimum Width** 500mm
- **Maximum Width** 5920mm
- **Projection Options** 750mm, 1000mm, 1250mm, 1500mm
- **Aluminium** Extruded 78mm Rolling Axle, Front Profile, Natural Anodised Finish
- **Fixing Options** Wall or Ceiling Mount
- **Arm Hardware** Imported European Arms, Silver Powder Coat Finish
- **Fixing Components** Stainless Steel or Cast Aluminium
- **Fabric** Planosol® 100% Acrylic - Over 40 colours
- **Automation** Nice® Tubular Motors with optional remote and Wind Sensor

BANNETTE™ DROP DOWN AWNING

Bannette™ Drop Down Awnings without arms are commonly specified with clear PVC, Planosol® or Solarview Fabrics and are ideal for commercial or patio/deck situations where you want weather protection.

Drop Down awnings can only be operated using a gearbox and crank handle.

- **Minimum Width** 500mm
- **Maximum Width** 4000mm
- **Maximum Drop** 3000mm
- **Aluminium** Extruded 78mm RollingAxle, Bottom Profile; 32mm Tube
- **Fixing Options** Face or Ceiling Mount
- **Fixing Components** Stainless Steel or Colour Matched
- **Fabric** Planosol® 100% Acrylic, PVC or Solarview

Solarzip™ is a vertical awning system for sheltering outdoor living areas from light winds and sun, whilst retaining the view and access to natural light.

Solarzip™ is specially designed to extend the use of covered pergolas, decks, louvre roofs and verandahs, by offering additional weather resistance to the sides of the shelter.

A special high temperature, welded side zip allows the fabric to be encapsulated within the powder-coated aluminium side tracks. Patented inserts act as movement absorbers, preventing the fabric from tearing within the tracks. Solarzip™ awnings can be operated using a gearbox and removable crank handle or motorised.

FABRIC

Choose from a wide range of awning fabrics or one of the specialist drop down awning fabrics, such as the Solarview range which is recommended especially for Solarzip. The fabrics allow relatively unrestricted views through the screen from the inside and privacy from the outside. Manufactured from a combination of 30% polyester / 70% PVC and finished in a sturdy 2 x 2 weave, Solarview fabrics have the ability to block up to 90% of UV light, which helps in controlling heat and light in the harsh NZ climate.

Solarview fabrics are available in a choice of modern colours to enhance your outdoor area.

- **Minimum Width** 500mm
- **Maximum Width** 4000mm
- **Max Drop** 3000mm
- **Aluminium** Extruded 78mm Rolling Axle, Bottom Profile, Side Guides
- **Fixing Options** Wall or Ceiling Mount
- **Fixing Components** Stainless Steel or Colour Matched
- **Optional Headbox** Extruded and Powder Coated Aluminium
- **Fabric** Solarview 12 Colours

Edge® Canopy Awnings are designed and custom made in New Zealand using high quality aluminium extrusions and toughened glass infill.

Edge® Canopy Awnings are the ideal solution offering entrance way shelter for homes, hotels, apartment buildings and office complexes. When used above an over an entrance way, Edge® Canopy Awnings not only “frame the space” but also make it more flexible and welcoming. When used over windows for sun protection, they help to conserve energy and create a more comfortable indoor environment.

The high quality extruded arms and connection plates can be custom powder-coated to match your existing joinery with a choice of over 40 standard Dulux® colours. The arms are custom made to any projection up to 1200mm and can be combined to form either a single or a continuous canopy for both residential and commercial applications.

INFILL

Choose from a range of clear or tinted toughened glass in grey, green or bronze. Ask your authorised Dealer for advice on the best solution for your application.

- **Minimum Width** 500mm
- **Maximum Width** Dependent on Projection and selected Glazing Material – ask your Authorised Dealer for advice
- **Minimum Projection** 500mm
- **Maximum Projection** 1200mm
- **Aluminium** Extruded Arms, Fixing Plates and End Caps
- **Fixing** Face Mount Only
- **Infill** Toughened Glass – Clear or Tinted Grey, Green, Bronze.

AWNING AUTOMATION

Nice tubular electric motors, remote controls and wind sensors combine design and ergonomic functionality to increase your comfort and safety. The motors fit discreetly inside the rolling axle to control your awning in a single movement.

Sophisticated shock-proof materials, immaculate finish plus essential wear, comfort and ease are guaranteed by the internationally renowned and prize winning Nice Italian designs.

NiceWay and Ondo Remote Controls are range of advanced transmitter modules to control awnings. Ondo is the versatile NiceWay line support; the wall support with its simple magnetic fixing system, transforms Ondo from a comfortable portable remote control to an inconspicuous wall plate. Ondo made in shiny dirt resistant plastic, has a rubber lower section to improve grip and prevent slipping when used on surfaces.

The Nice Volvo is a functional and elegant wind sensor for motorised Folding Arm, and Drop Down Awnings. The Wind sensors are fitted close to the motorised end of the awning to detect strong winds and then automatically retract the awning.

AWNING FABRICS

Awning Fabrics come in a variety of over 40 colours. They are 100% Acrylic meaning they will withstand wind, rain and pollution. Water repellent and Scotchgard protected, the translucent fabrics will allow filtered light and air through while still providing moisture protection. The fabrics are colour durable and resistant to most common chemicals, mildew and UV degradation.

IS THE FABRIC WATERPOOF?

The Fabrics are water repellent and breathable but not completely waterproof. Over time the water repellency can be refreshed by using Scotchgard Repellent Protector.

WILL THE FABRIC MILDEW?

Mildew will not grow on your Awning Fabric unless there is food, dirt or other organic matter on the fabric. Keeping the fabric clean is the best defense against mildew (see Care and Cleaning below). Bleach and other mildew removers do not affect the fabric so cleaning mildew is easy if necessary.

DOES THE FABRIC PROVIDE UV PROTECTION?

The fabrics have been tested and proven to prevent up to 98% of the suns UV radiation from passing through the fabric, when used in shade applications. The Cancer Society of New Zealand recommends shade as one of the key aspects of sun protection. The use of shade is especially important during the hours of 11am- 4pm. The Cancer Society provides guidelines for shade planning and design at www.cancernz.org.nz.

CARE AND CLEANING

One of the best ways to keep Awning fabrics looking good is to hose the fabrics off on a monthly basis with clear water. This will help prevent dirt from becoming deeply embedded in the fabric. In most environments a thorough cleaning will be needed every two to three years. This can be done while the fabric is still on the Awning by using cold water, a mild detergent like 'Woolite' and a soft bristle brush. Allow the detergent to soak into the fabric, then rinse thoroughly. Awning fabric must be air dried only.
